Sugar-Honey Creeks	5/13/02	draft TMDL (6 segments)	Under review by EPA/contractor
Token Creek	7/11/01	draft TMDL	Review complete by EPA, Final expected soon.

“Pre-TMDL” is used to describe watershed assessments and watershed modeling reports that will form the basis for TMDLs in that watershed. Since most pre-TMDLs will ultimately generate many TMDLs, it is not expected that the attorney reviewing the pre-TMDL will be responsible for all of the TMDLs that it generates.

“Draft TMDL” is used to describe a TMDL that is submitted to EPA for review and comment prior to a final version. Once the TMDL is submitted as final, EPA has 30 days to review and approve or disapprove. For this reason EPA encourages states to submit draft TMDLs for comment.
